Re: Batten Street Module Change

Dear Ms. Morgan,

Nexamp, Inc., (DBA Batten Street Solar, LLC) hereby notifies the Town of Webster Planning Board of its intention to swap Hyundai 355 watt modules to JA 385 watt modules. This change increases the nameplate Direct Current (DC) capacity from 1.284 MWs to 1.391 MWs.

The actual number of modules decreases as a result of this change, dropping from 3,618 to 3,614. No change is being made to the layout or design of the array. The Alternating Current (AC) nameplate capacity remains unchanged as well at 1 MW AC.

Please do not hesitate to reach out should you have any questions or concerns.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe Fiori".
